

COTTFN Community Alert System – Registration Information

The Nation has secured a Mass Notification System with AlertMedia Inc. The purpose of the software is to be able to communicate to community and administration staff clearly, quickly and efficiently in the event of an emergency.

How it Works

Community members can self-register to receive notifications through one or all contact methods they choose. This includes email (personal & work), text, cell phone, home phone, and work phone. Go to the Chippewa of the Thames First Nation's website <https://www.cottfn.com/>. On the homepage you will find the self-registration link where you can input the contact methods you wish to be notified by.

The notifications you receive will be **Emergency Notifications** only. For example, if COTTFN has a positive COVID-19 case, this notification system will be one method used to let everyone know. Daily notices will not be shared using this method. Please watch for flyers in your mailbox, the cottfn.com website, and COTTFN's official social media pages for non-emergency updates.

For more information on what is done with information collected can be found here:

<https://www.alertmedia.com/privacy-policy/>

When we are able too, there will be a community workshop where we will sit down and help those without internet to register for the Notification System. Currently, we are asking those who can assist friends and family with registering. You can also call Ashley at 519-870-5500 to get help with registering.

If you have any further questions, please feel free to contact the Emergency Management Coordinator,

Garett G. Cloud, MLEO(C), ICPS
Bylaw Enforcement Officer &
Emergency Management Coordinator
